

## High repetition rate dual-cavity DPSSL

For the measurement of unsteady flow field (TR-PIV), Beamtech offers Vlite-Hi-527 dual-cavity lasers with high repetition rate. In order to achieve higher repetition rate and better beam quality, Vlite-Hi-527 applies high-quality Nd:YLF laser crystal and acoustic optical Q switch technology, with energy up to 50mJ@1kHz and pulse width 200ns.

Vlite-Hi-527 applies ingenious light path design and engineering technology to ensure the high energy stability up to 1%. Because the laser intensity is IV class, the Vlite-Hi-527 series particularly emphasizes on safety and electromagnetic compatibility design, equipped with protection light lock, power supply interlock, flow switch, emergency stop switch, open box protection etc.

## Features

- Frequency continuously adjustable: 0.2-10kHz
- Pulse width: 200ns@1kHz
- Low timing jitter
- Integrated design of laser, light guide arm and sheet optics
- High beam combination stability of two cavities
- Ultra-uniform beam profile
- Compatible with a variety of PIV systems

## Applications

- Micro PIV
- 2D/3D PIV
- Tomographic PIV
- Time Resolved PIV
